

See the difference, and feel it.

IMAGING TECHNOLOGY

The market trend towards 2D barcodes has clearly spread across the whole data capture industry. This is particularly true at Retailers' where POS check-out activities face an increased need for 2D scanning and at the same time rely on reading mobile phone displays and loyalty cards.

THE MOST PROMPT RESPONSE AT THE POS CHECK-OUT

The QuickScan QD2500 2D imager is your trusted companion at the POS check-out. It knows very well the importance of prompt readings, whatever the barcode, regardless of whether it's hard-to-read, poorly printed or damaged, and it easily scans mobile devices and through plexiglass barriers, all at an incredibly affordable price.

EXTREME PRECISION CONVEYED

A sense of extreme precision is conveyed to the operator at any time. The outstanding aimer made of two blue sharply-defined triangles facilitates the job by clearly showing where the scanner is pointing. Datalogic's 'Green Spot' technology then confirms the good read, perfectly centered on the barcode and between the two triangles, backed up by a powerful beeper that can be adjusted to your preferred level of sound. Overall, the soothed illumination lowers fatigue on the operator's eyes.

CUTTING-EDGE DESIGN AND FEATURES

Whenever the operator needs to switch the scanner from the presentation scanning mode to manual reading and vice-versa, the QuickScan QD2500 features Datalogic's advanced Motionix™ motion-sensing technology to detect it automatically.

Maintaining the distinctive design and family feeling of the Datalogic handheld purpose offering of handheld scanners, the QuickScan QD2500 offers a choice of two colors: black and white, and a variety of stands and accessories to best fit in any in-store environment.

FEATURES

- 1 MP optics for superior scanning and Depth
- Datalogic distinctive technology LED-based
- Datalogic's 'Green Spot' technology for
- Motionix™ patented motion-sensing
- Omnidirectional reading
- Reads 1D, 2D, postal codes, s'
- Watermark codes
